

FLYNOW

Press Release: POLYTEC GROUP and FlyNow Aviation announce their partnership to advance Urban Air Mobility.

Salzburg, 13th January 2023: The POLYTEC GROUP is a leading developer and manufacturer of high-quality plastic solutions. For more than 35 years, the POLYTEC GROUP has been offering its customers experience and know-how, not only as a complete supplier for injection moulding, but also as a specialist for fibre-reinforced and polyurethane components.

FlyNow Aviation GmbH develops and produces an efficient, automatically flying, electric modular eVTOL (electric Vertical Take-Off and Landing) family consisting of cargo and personal air vehicles. These eVTOLs are conceptually superior to all currently known developments of manned and unmanned eVTOL's in the areas of noise emission, energy efficiency, ergonomics, production cost and cost of operation.

Moreover, when speaking of eVTOLs, component weight and stability play a central role. Therefore, since over two years FlyNow Aviation and POLYTEC GROUP work in close collaboration and develop ultralight structural plastic parts for the eVTOL family applying innovative and sustainable processes for mass production.

POLYTEC GROUP and FlyNow Aviation both share the same passion for innovation. Therefore, POLYTEC GROUP and FlyNow Aviation are glad to jointly work on a safe, comfortable and clean means of transport for future mobility.
